161f ▸ printf("%lld\n", lo);
cbb1 }

```

7 Anotações

7.1 Intersecção de Matróides

Sejam $M_1 = (E, I_1)$ e $M_2 = (E, I_2)$ matróides. Então $\max_{S \in I_1 \cap I_2} |S| = \min_{U \subseteq E} r_1(U) + r_2(E \setminus U)$.

7.2 Möebius

Se $F(n) = \sum_{d|n} f(d)$, então $f(n) = \sum_{d|n} \mu(d)F(n/d)$.

7.3 Burnside

Seja $A: GX \rightarrow X$ uma ação. Defina:

- $w :=$ número de órbitas em X .
- $S_x := \{g \in G \mid g \cdot x = x\}$
- $F_g := \{x \in X \mid g \cdot x = x\}$

$$\text{Então } w = \frac{1}{|G|} \sum_{x \in X} |S_x| = \frac{1}{|G|} \sum_{g \in G} |F_g|.$$

7.4 Landau

Existe um torneio com graus de saída $d_1 \leq d_2 \leq \dots \leq d_n$ sse:

- $d_1 + d_2 + \dots + d_n = \binom{n}{2}$
- $d_1 + d_2 + \dots + d_k \geq \binom{k}{2} \quad \forall 1 \leq k \leq n$.

Para construir, fazemos 1 apontar para $2, 3, \dots, d_1 + 1$ e seguimos recursivamente.

7.5 Erdős-Gallai

Existe um grafo simples com graus $d_1 \geq d_2 \geq \dots \geq d_n$ sse:

- $d_1 + d_2 + \dots + d_n$ é par
- $\sum_{i=1}^k d_i \leq k(k-1) + \sum_{i=k+1}^n \min(d_i, k) \quad \forall 1 \leq k \leq n$.

Para construir, ligamos 1 com $2, 3, \dots, d_1 + 1$ e seguimos recursivamente.

7.6 Gambler's Ruin

Em um jogo no qual ganhamos cada aposta com probabilidade p e perdemos com probabilidade $q := 1 - p$, paramos quando ganhamos B ou perdemos A . Então $\text{Prob}(\text{ganhar } B) = \frac{1-(p/q)^B}{1-(p/q)^{A+B}}$.

7.7 Extra

- $\text{Fib}(x+y) = \text{Fib}(x+1)\text{Fib}(y) + \text{Fib}(x)\text{Fib}(y-1)$
